

Dedicated Internet

Ringed topology,
resilient connections

In today's digital world, businesses depend on reliable, real-time access to their data and web-based applications. Bluebird's Dedicated Internet Access (DIA) service delivers **symmetrical**, carrier-grade fiber internet access via our owned and operated 100% fiber optic backbone. With speeds up to 400 Gbps, Bluebird provides you with simple, manageable and scalable high-capacity bandwidth.

Dedicated

Never share bandwidth.

Fast

Port speeds up to 400 Gbps.

Reliable

Internet access 24/7/365.

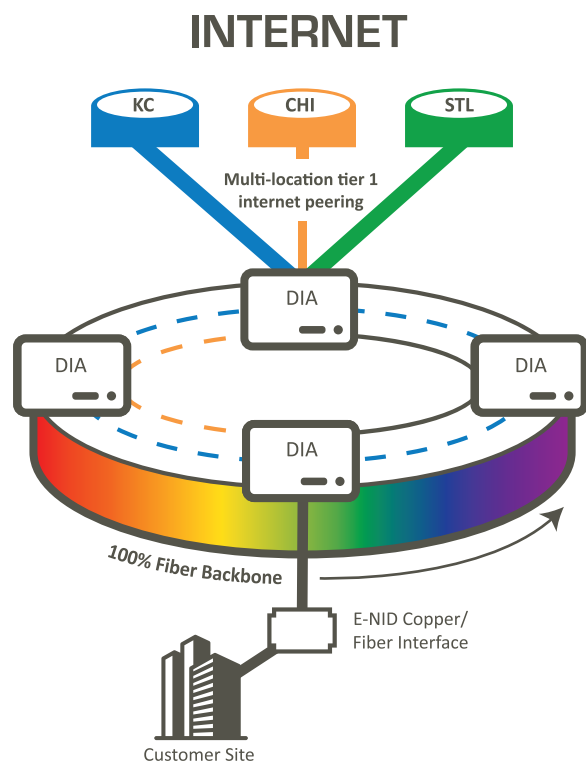

Symmetrical

Equal speeds up and down.

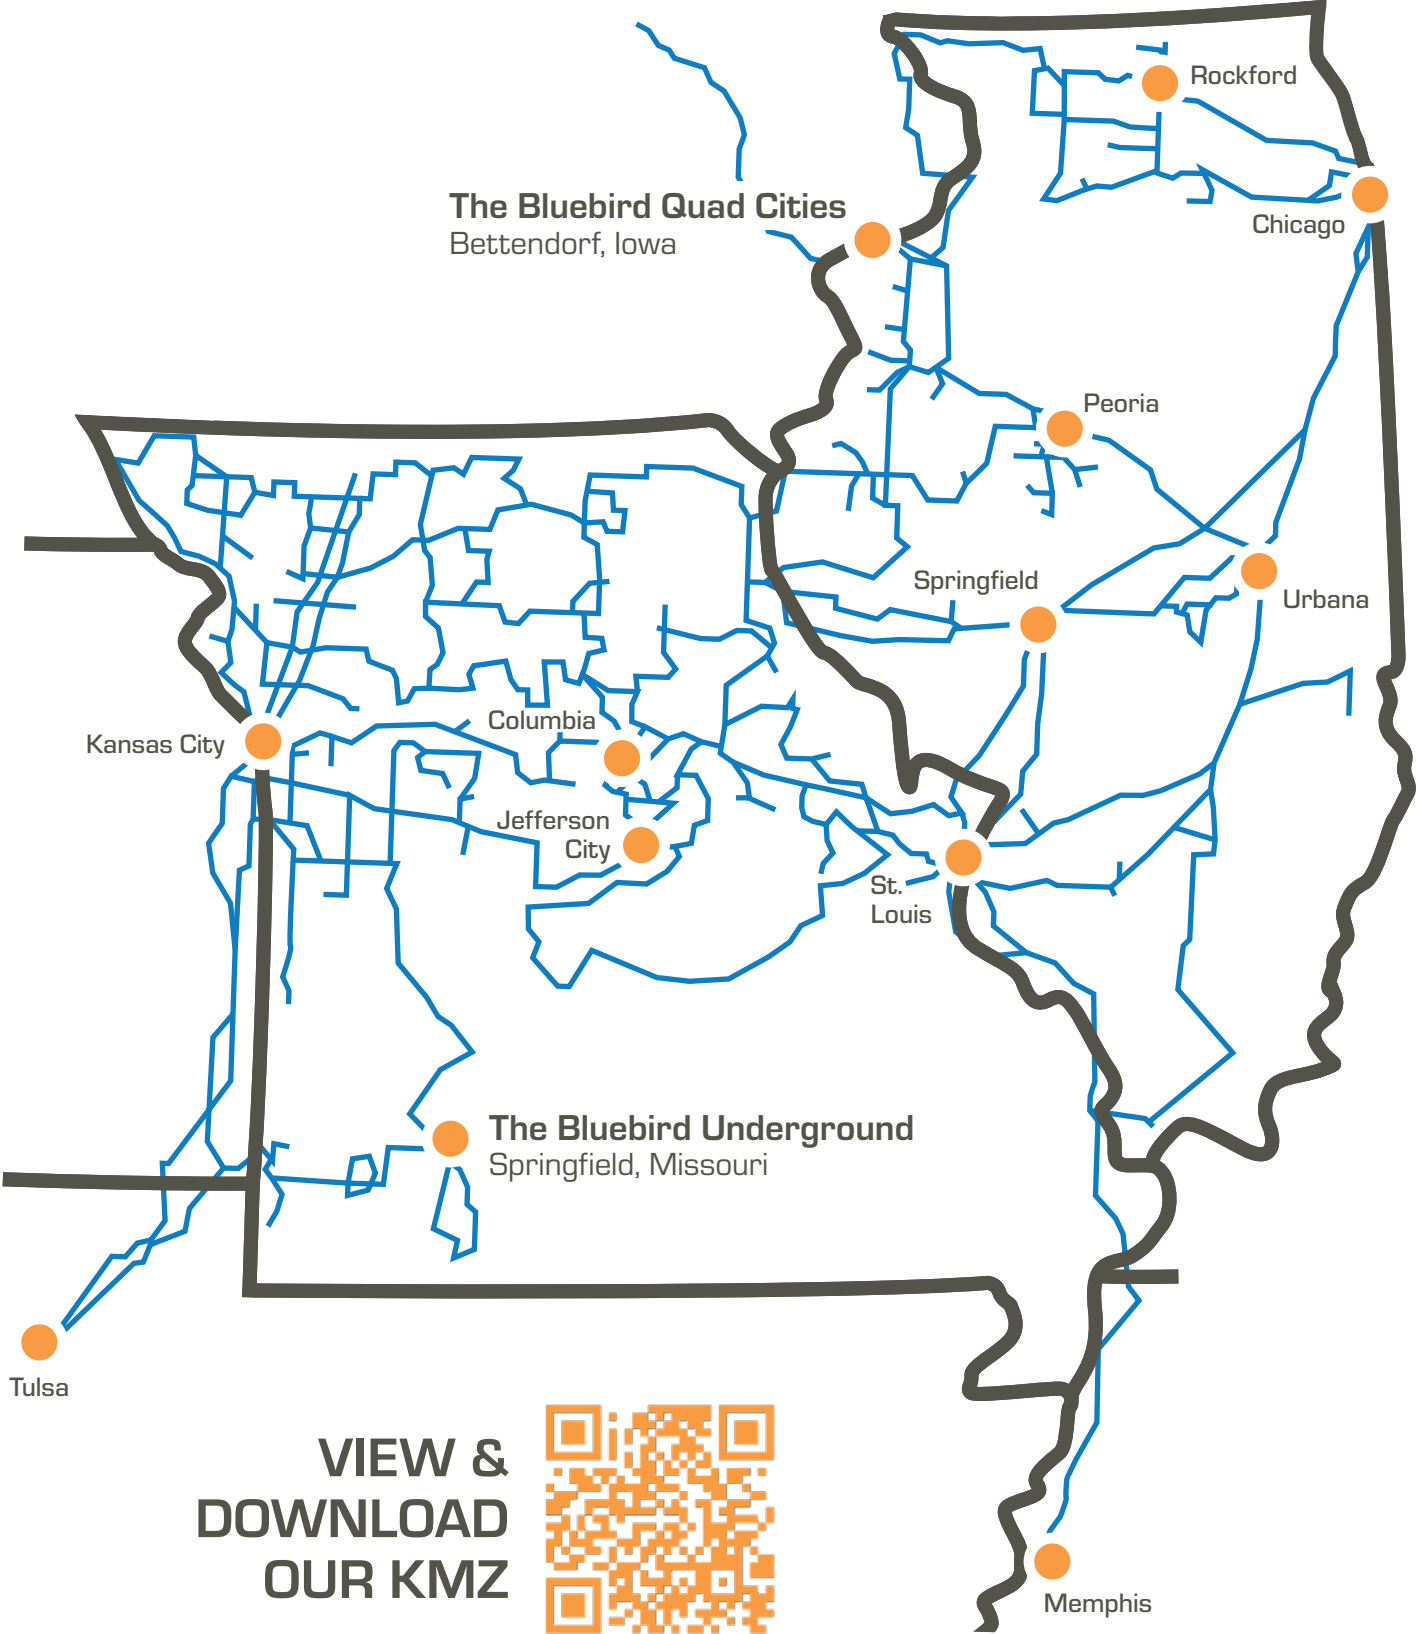

Benefits

- Your connection to the internet is dedicated, symmetrical and never shared with others
- 24/7 in-house customer support with proactive monitoring assures continuous end-to-end availability
- Redundant and reliable IP network with extensive Tier 1 peerings
- **Ringed topology, resilient connections**
- Multi-Protocol Label Switching (MPLS) provides instantaneous rerouting and core redundancy

Our Network Map

- +11,000 owned & operated route miles of fiber
- +70,000 on/near-net buildings
