

WAN Solutions

Wide Area Networks with ease

Bluebird Network's Wide Area Network service delivers high-speed, scalable connectivity over a private, secure network. It supports point-to-point, point-to-multipoint, and fully meshed configurations, tailored to meet your business needs. With low latency and high reliability, it ensures seamless data transfer and optimal performance. Ideal for businesses requiring robust and flexible network solutions.

Flexibility

You have the ability to use EPL, EVPL, EP-LAN, or just Mobile Backhaul Transport.

Security

Ensure privacy for all of your locations with a WAN solution.

Dynamic

If you have 2 office or 15, our WAN solutions are custom to YOU and your needs.

1

EPL & EVPL

Installed ethernet network interface device at ever customer location

2

E-LAN

Provides a direct channel of communication between multiple sites/devices

3

Mobile Backhaul Transport

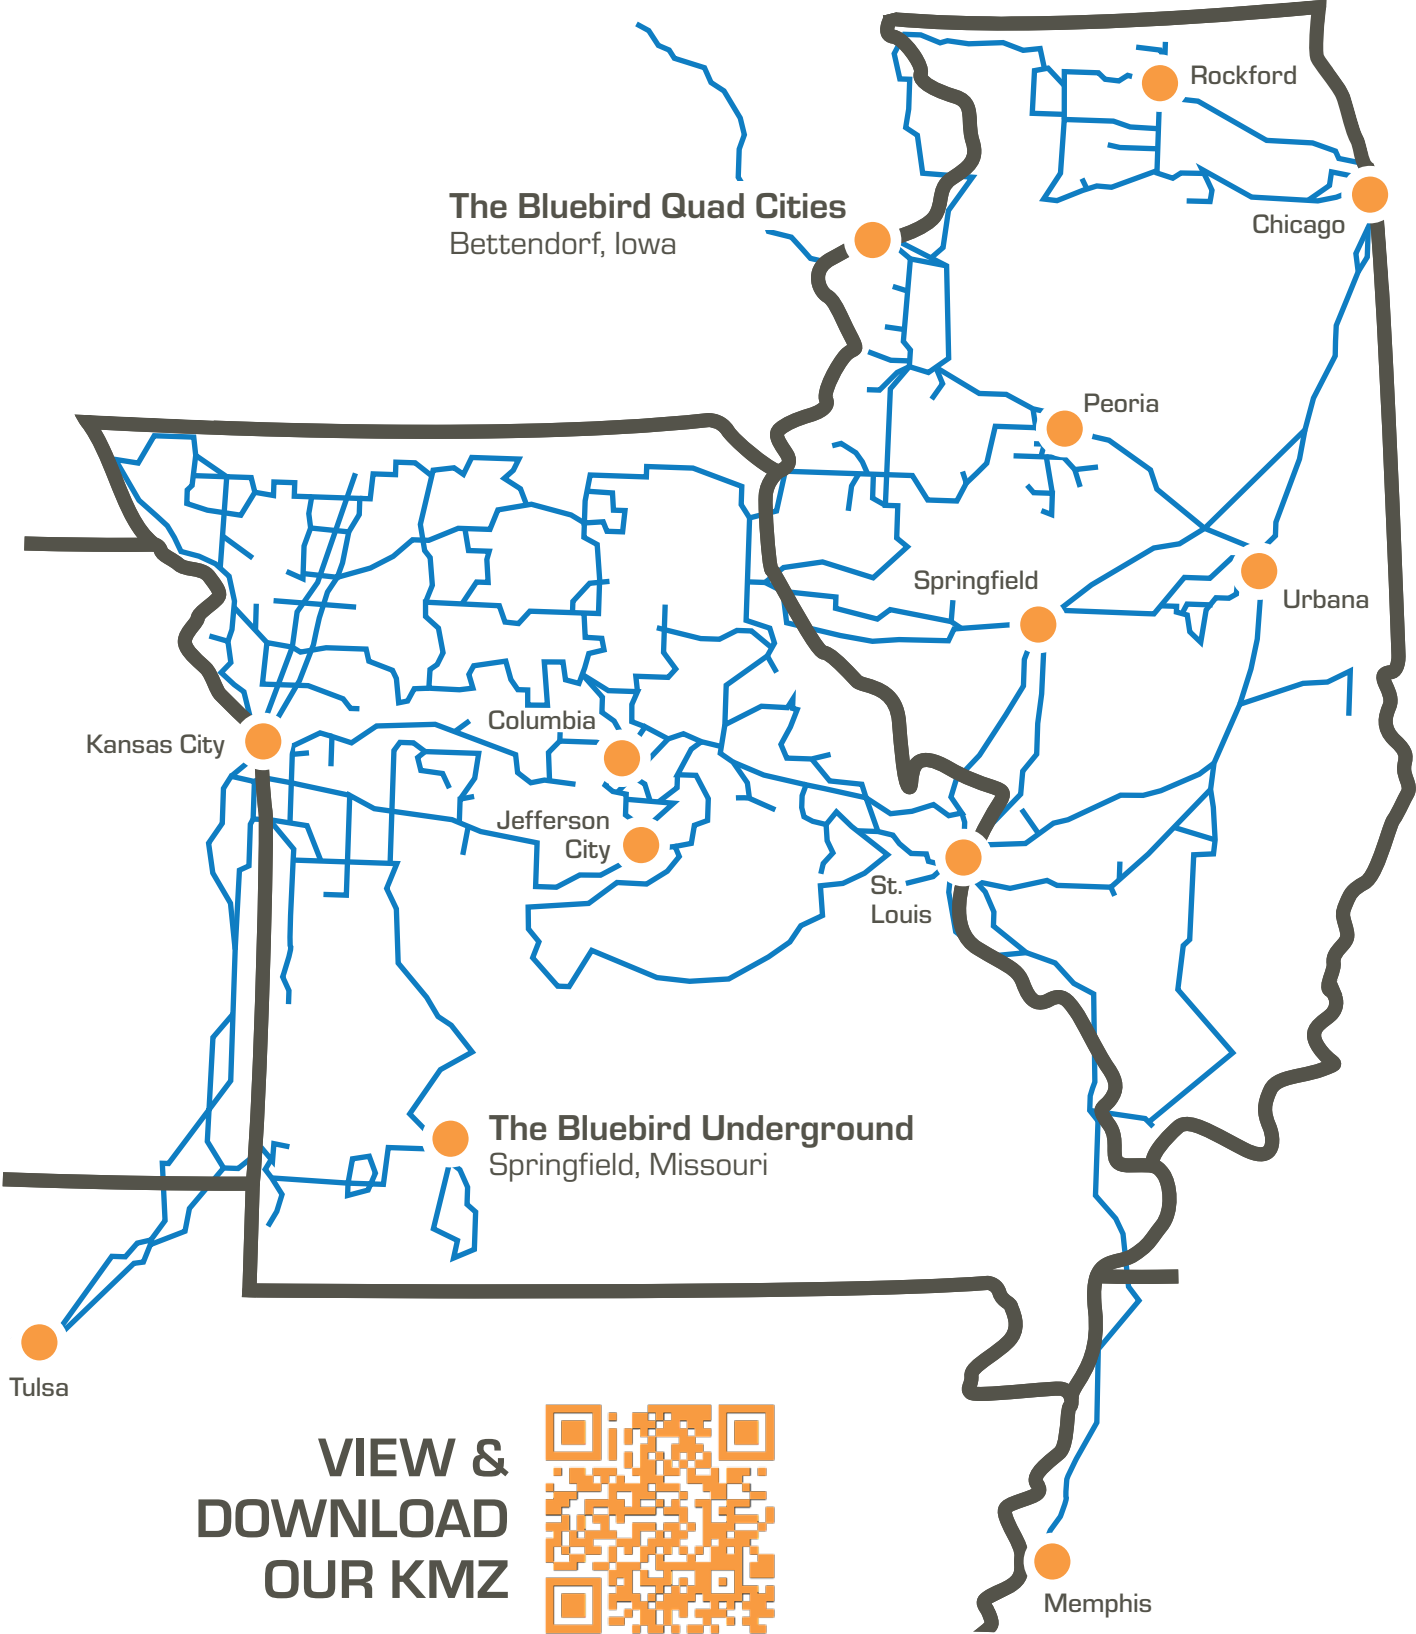

Consolidate transport needs for multimedia data

A WAN Solution is Right For You if...

- You need to efficiently connect nonadjacent locations to form a secure network environment
- Your business utilizes bandwidth-hungry applications
- You want to simplify the network infrastructure within your organization
- You need centralized network management
- You need consistent monitoring and troubleshooting for your customers

Our Network Map

- +11,000 owned & operated route miles of fiber
- +70,000 on/near-net buildings
