

# Cloud Connect

Private connections to the cloud

Bluebird Network's Cloud Connect provides secure, high-speed access to top cloud service providers via a dedicated, private connection. This solution ensures reliable performance, reduces latency, and enhances data security. It seamlessly integrates with your existing infrastructure, allowing businesses to scale resources effortlessly. With Cloud Connect, your business can optimize its cloud operations while maintaining robust and consistent connectivity.

## Speed

Access your data within the cloud faster with lower latency and higher throughput.

## Security

Avoid the risks of the public internet with Cloud Connect.

## Simplicity

Customize your solution to fit your needs while decreasing costs by lowering data egress fees.

## 3 Step Set-Up

1

Inform your Cloud Service Provider (CSP)

2

Connect us with your CSP information

3

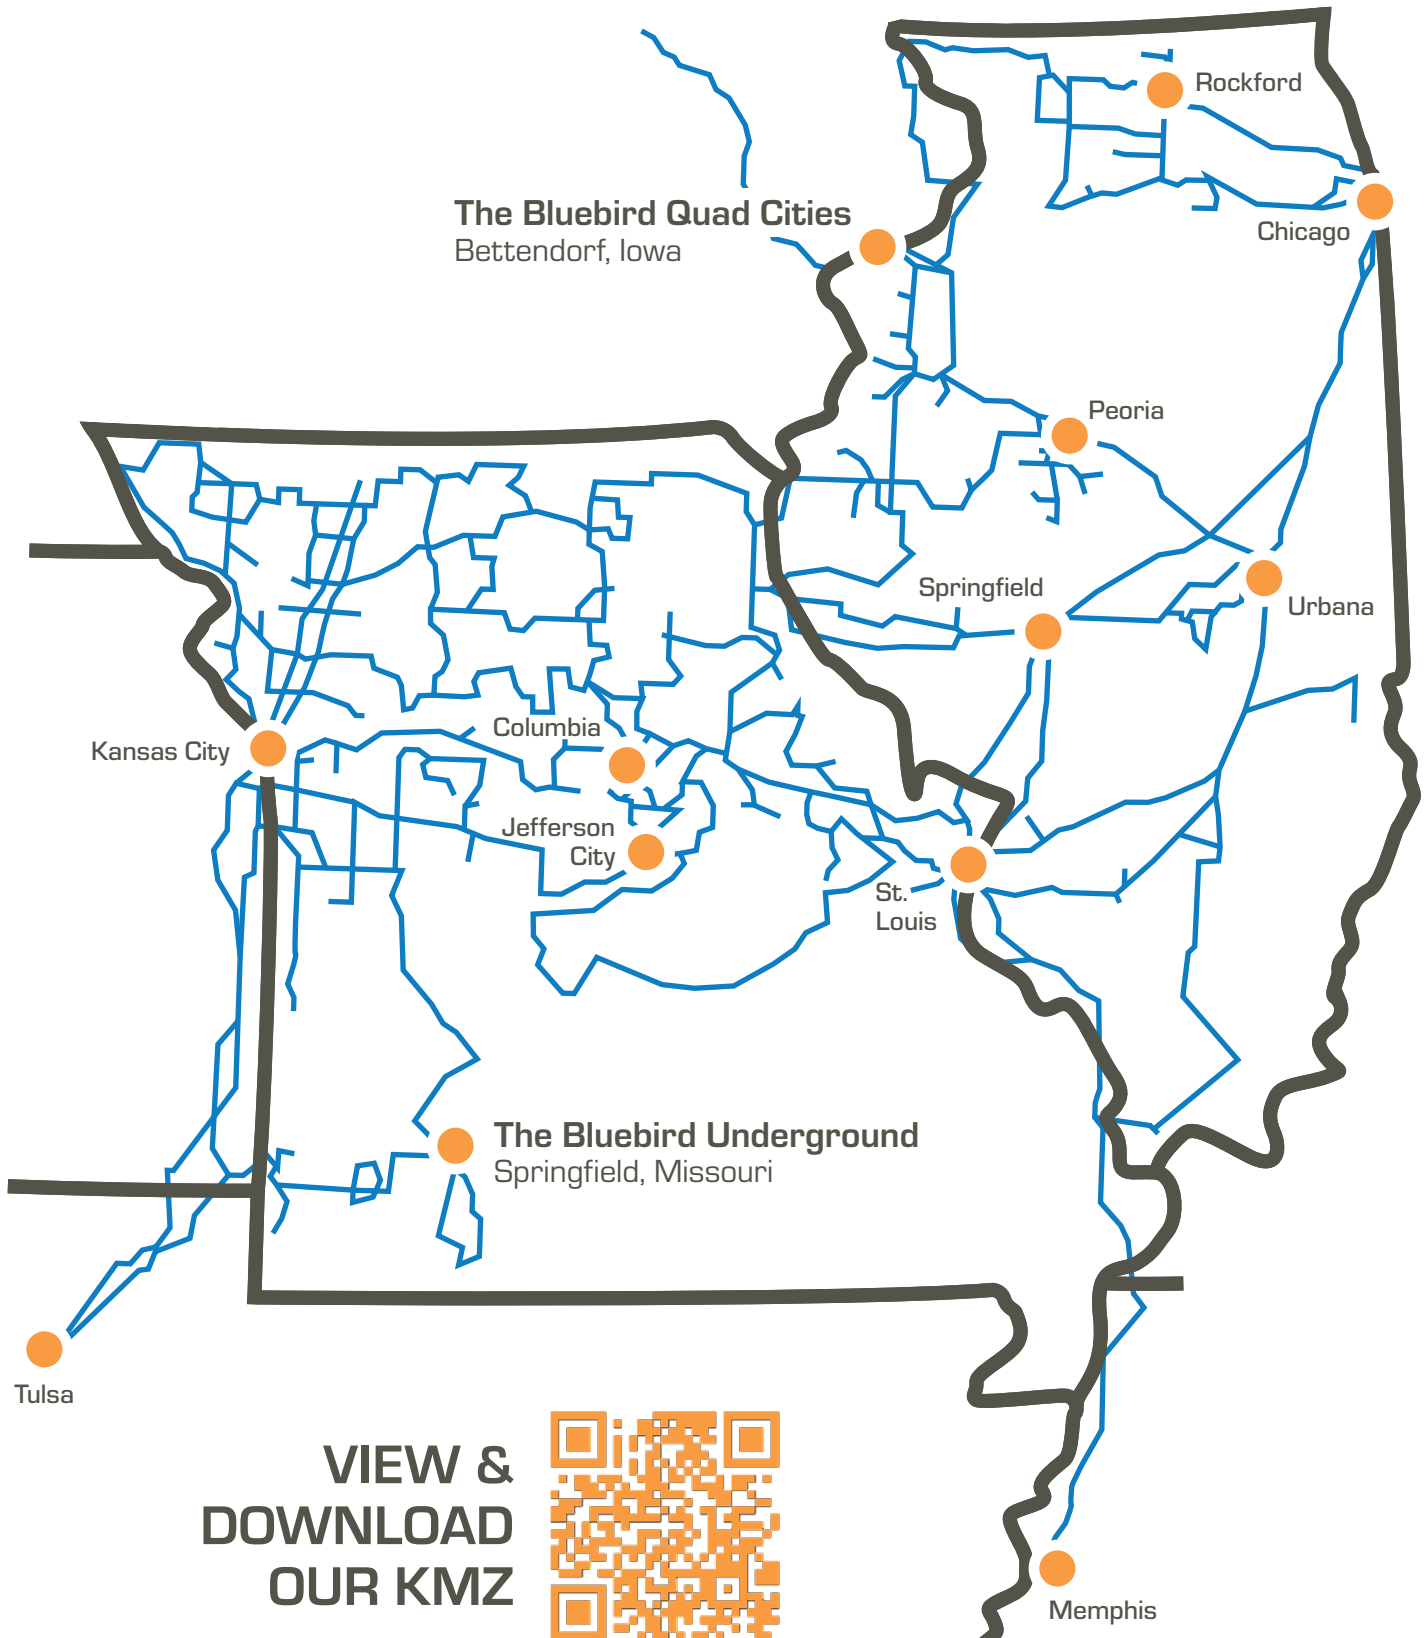

Let Bluebird handle the rest!

## Features & Benefits

- Speed, privacy and simplicity
- Access to +220 CSPs
- Easy set up process
- More reliable than a VPN
- Removes vulnerability of DDoS attacks
- Jitter mitigation through controlled latency

# Our Network Map

- +11,000 owned & operated route miles of fiber
- +70,000 on/near-net buildings
