- (A) Service is classified as Business service where the use is primarily or substantially of a business, professional, institutional, or otherwise occupational nature.
- (B) Business rates apply at the following locations, among others:
  - 1. In offices, stores and factories, and in quarters occupied by clubs, lodges, fraternal societies, schools, colleges, libraries, hospitals, and other business establishments.
  - 2. In residence locations where the place of residence is in immediate proximity to a place of business and it is evident that the telephone in the residence is or will be used for business purposes, and in residence locations where an extension is located at a place where business rates would apply.
  - 3. In the residence of a practicing physician, dentist, veterinary, surgeon, or other medical practitioner who has no service at business rates at another location.
  - 4. In any residence location where there is substantial business use of the service and the customer has no service at business rates.

**3.2 Charges Based on Duration of Use**

**SECTION 3 - SERVICE OFFERINGS (CONT'D)**

- (A) Calls are measured in durational increments identified for each service. All calls that are fractions of a measurement increment are rounded up to the next whole unit.
- (B) Timing on completed calls begins when the call is answered by the called party. Answering is determined by hardware answer supervision in all cases where this signaling is provided by the terminating local carrier and any intermediate carrier(s). Timing for operator service person-to-person calls start with completion of the connection to the person called or an acceptable substitute, or to the PBX station called.
- (C) Timing terminates on all calls when the calling party hangs up or the Company's network receives an off-hook signal from the terminating carrier.
- (D) Calls originating in one time period and terminating in another will be billed in proportion to the rates in effect during different segments of the call.
- (E) All times refer to local time.

**3.3 Rates Based Upon Distance**

Where charges for a service are specified based upon distance, the following rules apply:

3.3.1 Distance between two points is measured as airline distance between the Rate Centers of the originating and terminating telephone lines. The Rate Center is a set of geographic coordinates, as referenced in National Exchange Carrier Association, Inc. Tariff FCC No. 4, associated with each NPA-NXX combination (where NPA is the area code and NXX is the first three digits of a seven digit telephone number). Where there is no telephone number associated with an access line on the Company's network (such as a dedicated 800 or WATS access line), the Company will apply the Rate Center of the Customer's main billing telephone number.

**3.4 Calculation of Distance**

Usage charges are based on the airline distance between the serving wire centers associated with the originating and terminating points of the call. The serving wire centers of a call are determined by area code and exchange numbers. All calls are billed from the End User's serving wire center to the terminating point serving wire center.

The distance between the originating point and that of the destination point is calculated by using the "V" and "H" coordinates as defined by NECA Tariff FCC No. 4, in the following manner:

- Step 1: Obtain the "V" and "H" coordinates for the originating point and the destination point.
- Step 2: Obtain the difference between the "V" coordinates of each of the Rate Centers. Obtain the Difference between the "H" coordinates.
- Step 3: Square the differences obtained in Step 2.

**SECTION 3 - SERVICE OFFERINGS (CONT'D)**

- Step 4: Add the squares of the "V" difference and "H" difference obtained in Step 3.
- Step 5: Divide the sum of the square obtained in Step 4 by ten (10). Round to the next higher whole number if any fraction results from the division.
- Step 6: Obtain the square root of the whole number obtained in Step 5. Round to the next higher whole number if any fraction is obtained. This is the distance between the originating and terminating serving wire centers.

Formula:

$$\sqrt{\frac{(V_1 - V_2)^2 + (H_1 - H_2)^2}{10}}$$

**3.5 Directory Listings**

For each Customer of Company-provided Exchange Access Service(s), the Company shall arrange for the listing of the Customer's main billing telephone number in the directory(ies) published by the incumbent Local Exchange Carrier in the area at no additional charge. For Customers with multiple premises served by the Company, the Company will arrange for a listing of the main billing telephone number at each premise.

**3.7.1 Business Essential Package**

- (A) Business Essential Package provides a customer with all the features of local exchange service set forth above, provided over a single, voice-grade telephonic communications channel which can be used to place or receive one call at a time. **3.8 Directory Assistance Service**

The Company furnishes Directory Assistance Service (“DA”) for the purpose of aiding subscribers in obtaining telephone numbers of subscribers who are located within the same exchange area as the number the party is calling from.

In order to make allowance for a reasonable need for DA service within the same local exchange area, including numbers not in the directory, directory inaccessibility and other conditions, no charge applies for the first three calls for telephone numbers of subscribers who are located within the same local exchange area of the calling party per month per station access line. The allowance is cumulative for all group billed services furnished on the same premises or as part of the same system within the same exchange.

Charge per call after allowance \$0.95.

**3.9 IntraLATA Presubscription****3.9.1 General**

IntraLATA presubscription is a procedure whereby a subscriber designates to the Company the carrier which the subscriber wishes to be the carrier of choice for intraLATA toll calls. Such calls are automatically directed to the designated carrier, without the need to use carrier access codes or additional dialing to direct the call to the designated carrier. IntraLATA presubscription does not prevent a subscriber who has presubscribed to an intraLATA toll carrier from using carrier access codes or additional dialing to direct calls to an alternative intraLATA toll carrier on a per-call basis.

**3.9.2 Options**

Option A: Subscriber may select the Company as the presubscribed carrier for intraLATA toll calls subject to presubscription.
