BLUEBIRD FIBER

Power Your Next Deployment With Dual Feeds

Bluebird Fiber Quad Cities Data Center | Bettendorf, Iowa

2701 Devils Glen Road
Bettendorf, IA 52722

When you're moving critical systems or adding capacity, backup generators are only part of the continuity plan. Utility-feed diversity, UPS redundancy and cabinet power distribution all matter because a power interruption shouldn't have to become a business interruption.

Bluebird's Quad Cities data center combines dual utility feeds, N+1 UPS redundancy and A/B cabinet power to provide multiple layers of protection for critical systems. Flexible colocation options give you room to grow, while direct access to Bluebird's owned Midwest fiber network keeps your equipment connected to the rest of your business.

Colocation Options

Choose from one-third to full cabinets or dedicated customer areas starting at 100 square feet. Contiguous space accommodates larger installations, with cabinet power configurations of 25–35 kW.

Power Infrastructure

Dual utility feeds provide 4 MW of utility capacity. N+1 UPS redundancy and A/B cabinet power are available, along with two 2 MW backup generators.

Network Services

DEDICATED INTERNET ACCESS | ETHERNET | WAVELENGTHS | DARK FIBER

Take a Tour

Walk through the facility and review the power infrastructure, available space and connectivity options with Bluebird's team.

Quad Cities Technical Specifications

Facility and Colocation Space	Facility address	2701 Devils Glen Road, Bettendorf, IA 52722
	Facility size	52,000 square feet
	Production space	20,000 square feet
	Cabinet options	One-third to full cabinets
	Dedicated customer space	Areas starting at 100 square feet
	Cabinet power density	25–35 kW per cabinet
	Larger deployments	Contiguous space for installations requiring adjacent equipment areas
Power and Critical Systems	Utility capacity	4 MW
	Utility service	Dual utility feeds
	Power distribution	Dual A/B utility power distribution
	UPS redundancy	N+1
	Cabinet power	A/B cabinet power available
	Generator configuration	Two 2 MW generators
	Installed generator capacity	4 MW total
	Switchgear	GE
Network and Connectivity	Network access	Direct connection to Bluebird Fiber's owned network
	Connectivity	Up to 100G
	Carrier connectivity	10 diverse carriers
	Network services	Dedicated Internet Access, Ethernet, Wavelengths and Dark Fiber
	Cloud connectivity	Cloud on-ramp connectivity options
Physical Security and Compliance	Access controls	24/7 keycard and biometric access controls
	Surveillance	24/7 video surveillance and monitoring
	Compliance audits	SOC 2 Type I and Type II audited
	Additional audit	PCI audited
Operations and Support	Technical support	24/7/365
	Remote assistance	Smart Hands / Tier 1 hands-and-feet services
	Customer tools	Customer portal

Schedule a Quad Cities Tour

Walk the facility and review the power infrastructure with Bluebird's team. Bring your deployment requirements and see how the available space can accommodate your equipment.
